

Intensive Behavioral Health Services Access Survey

make your voice heard

The Mental Health Planning Council (MHPC) of PA, part of the Office of Mental Health and Substance Abuse Services (OMHSAS), is conducting a state-wide survey to gather feedback on successes and challenges in delivering Intensive Behavioral Health Services (IBHS) to the youth your agency works with.

Your feedback is important to us and will be shared anonymously with state and local behavioral health agencies in order to better inform them of provider experiences.

The survey link and QR code can be found below. The survey will take about five minutes to complete. Please feel free to share with other providers as well. Thank you for your valuable feedback!
